

METAL PRODUCTION CAPACITIES GRADISKA

Project title	Development and improvement of metal production capacities, Gradiska
Sector	Metal Sector
Location	Municipality Gradiska
Location description	The company is located within the Nova Topola agroindustry zone, Gradiska, distanced 10 km away from the border crossing with Croatia, 10 km from the Mahovljani Airport, and 5 km away from the entry in the Banjaluka-Gradiska highway.
Company description/ Project background	Solar mont d.o.o. was founded in 2010, the main activity is the production of metal structures and their parts, steel tanks, distillers for essential oils, steam and hot water boilers and similar products from the field of process technology. We own a commercial production facility with an area of 650 m2 and a building land area of 8200 m2, which provides the possibility of expanding production capacities.
Project status	Our plan is to cooperate with a partner from the EU regarding the production of products or semi-products according to needs and specific requirements, with the possibility of joint investment in new production lines and expansion of existing capacities. We are also interested in the option of selling construction land and a commercial building.
Project description	In the past few years, we purchased construction land within the Nova Topola Industrial Zone, Gradiska. After that, we built a commercial production facility and acquired additional machines and equipment for metal processing that we need for current production activities.
Estimated total investment cost	According to the contract and plan of future cooperation.

Inputs provided by local partner	**Value**	**Description**
	500.000,00 €	Purchase of construction land, construction of the building, procurement of machinery and equipment.
Inputs required from foreign partner	**Value**	**Description**
		According to the contract and plan of future cooperation.
Form of cooperation with foreign partner	**Financial**	**Technical**
	Partnership, Joint Venture, sale, rent
